Lawyers typically make a multitude of decisions daily, affecting themselves and others, and where unconscious biases are in play, the outcomes may be less than optimum and often contrary to your intentions.

In this interactive course, practitioners will learn about the concept of unconscious bias, how it affects their business and industry, and equip themselves with tools to increase their effectiveness in decision making situations. Videos, case studies and revealing questions engage the learner in this relevant and fast paced program. A practical toolkit is provided to enable practitioners to counteract bias in decision situations.

## Contents

- The Case for Diversity & Inclusion
- Understanding Unconscious Bias
- Bias in the Legal Profession
- Bias, Diversity and the Law
- Counteracting Bias Toolkit
